# EIP's Renewable Energy Program grabs attention in Syracuse, Italy

[www.siracusanews.it](http://www.siracusanews.it)

by **EIP** on 12 December 2019

At EIP Ireland, we are proud of the impact our Renewable Energy education program is having on local communities and abroad, providing a unique experience that allows students to acquire knowledge and skills on renewable energy; a core issue in the world today. This program made its way across the Irish Sea, all the way to Italy as the experience of alternating school work in Ireland offered by EIP was mentioned in an Italian newspaper.

EIP Ireland's Renewable Energy 20-day school work educational program is designed to prepare youth with the tools needed to respond to the challenges of climate change and to become environmental ambassadors for the sustainable development of their local communities.

One of these communities is Syracuse, located in the southeast corner of the island of Sicily, where 15 students were given the opportunity to participate in EIP Ireland's Renewable Energy Program, aiming to show them the challenges that are faced by those from other nations or cultures, such as their corporate tutor Grace Acedo, who has participated in wave energy projects in New Zealand.

Affordable and clean energy has a vital role to play in today's education. EIP Ireland hopes to motivate young generations to be a force for change for communities who are currently affected by clean energy shortages such as Syracuse.

EIP Ireland's Renewable Energy Program is designed to boost student's awareness of energy-related challenges across the world. It seeks to inform and empower today's students and show them that they can contribute to a future that has clean, renewable and affordable energy for all. Ireland is fast becoming one of the leading lights in Renewable Energy. This course will amaze you with the level development that is currently happening in Ireland in all different areas of renewable energy.

During the students time here, EIP also gave the students a taste of traditional Irish life through daily activities such as teaching students all that is Irish, from learning how to cook traditional Irish foods to participating in games of Gaelic football, hurling and basketball.
